

## Information regarding elective course registrations

The following rules will be implemented during Spring 2023 elective course registrations:

1. For any student eligible to take a BA elective course, the TOTAL number of registered courses cannot exceed **five**, including *(i)* required courses, *(ii)* BA electives, *(iii)* non-departmental electives, and, *(iv)* free electives. The 1-hour lab courses and non-credit courses are not included in this total.
2. If a student has signed up for more than five courses described in the categories above, her/his registration will not be approved until the total number of courses is brought back to five by dropping the extra electives the student has signed up for during registrations. Please note that required courses cannot be dropped in order to bring the total down to five. The student needs to drop all extra electives.

These rules do not apply to students who need to take more than five 3-credit courses in order to graduate within two semesters.

Elective courses offered this semester are going to be available for registration by BA students starting at **15:00 on Wednesday, March 1, 2023.**
